

The UPM International Summer School (ISS) is an six-week multilingual study abroad programme, addressing some of the latest trends in **technology, engineering** and **architecture**, combined with a taste of Spanish language and culture in one of Europe's most cosmopolitan cities. The UPM ISS programme offers a wide range of short courses of varying length taught in Spanish and/or English. Participants are free to put together their own track by combining courses with compatible schedules. The UPM ISS gives participants the chance to learn basic Spanish language and culture, and the social programme includes weekend activities, such as day trips to top attractions like Toledo, Segovia and Alcalá de Henares, and guided walks around Madrid and visits to the Prado and the Queen Sofía Art Museums.

The UPM ISS primarily targets international undergraduate and postgraduate engineering, ICT and architecture students, although professionals are welcome to join courses of their interest.

The 2023 UPM International Summer School will run from **19 June to 28 July 2023 in Madrid**.

Register here: [Application for 2023 UPM International Summer School](#)

The deadline for applications is **30 April 2023** (students will be admitted on a first come, first served basis). There is an early bird rate for students who register before 28 February 2023 and discounts for UPM students.
